

Portable Indoor Scoreboard

MASCOT™ III

A classic scoreboard design combined with All American's proven high-tech microprocessor control system that is truly a winner for any sport.

MASCOT III is the perfect answer to secondary and portable indoor scoreboard needs for a variety of athletic events including basketball, volleyball, wrestling and hockey games. A built-in storage compartment with a key-lock holds the control console, control cable, and power cord for easy storage. MASCOT III is available with optional non-illuminated sponsor advertising panel (size - 5" high x 35" wide) mounted on top of the scoreboard.

Some of the microprocessor control console features include: pressure sensitive touch pad keyboard • hi-impact case • liquid crystal display (LCD) monitor • audible feedback for entry verification • ascending/descending timer mode • low voltage control operates on 12 volts with scoreboard using less than 15 watts of power • console does not require external power • multi-sport programmable keyboard • game in progress monitor capabilities.
