LED Illuminated Remote  
Price Changer System

***Changing the way you change your prices!***

Everbrite proudly introduces our newest generation of illuminated remote price changer systems - LumiDigit™.

The LumiDigit Remote Price Changer System is based on an array of remotely controlled, LED numeric modules capable of displaying

0/9. Primarily used for identification price signs, the LumiDigit system provides greater legibility than typical "seven segment" digits.

Price changes are easily and safely accomplished, since the ability to change prices is not dependent on weather conditions, ladders, changer arms, placards, or personnel availability.

By "changing the way you change your prices," Everbrite's state-of-the-art LumiDigit System is one of the best ways you can maximize profit opportunities in a highly competitive marketplace.

# LumiDigit™

LED Illuminated Remote Price Changer

In addition to utilizing the standard advantages of LED technology including: low maintenance, minimal power consumption, 100,000 hour life expectancy\* and vibration resistance, our new LumiDigit™ LED illumination system offers many upgraded features. Each illuminated numeral is individually serviced from the front and displays an extremely wide, oblique viewing angle. Additional enhancements include super bright LED's, which substantially increase brightness levels, and tinted lenses which provide both enhanced color contrast for exceptional readability and impact resistance. Electronic components are centrally located and provide for easy access.

## Standard Control Console (Direct Hardwire)

LumiDigit™ offers the latest in microprocessor technology within its low profile control console. The console features a durable membrane keypad, in addition to a LCD panel which provides visual confirmation to the operator for information displayed on the remote sign(s). Whatever the ambient light conditions, our variable dimming capability includes nine levels of brightness to ensure optimal visual performance, even in direct sunlight.

## LumiDigit™ LED Illuminated Remote Price Changer System proudly features:

- Long life, energy efficient LED's provide little or no maintenance
- Electronics: 100% solid state, microprocessor-controlled system
- Available in standard numeral heights of 8" (203mm), 10" (254mm), 14" (356mm) and 18.5" (470mm). Other sizes available upon request\*\*.
- Standard colors include: Red and amber  
Other colors available upon request\*\*.
- Keypad: Touch-pad membrane data entry with tactile feedback
- LCD Monitor: Provides visual confirmation to the operator of information being entered and shows all data simultaneously in a 2 line x 16-character display window
- Overall Console Dimensions: 4" (102mm) wide by 7.5" (191mm) deep by 2" (51mm) tall and weighing less than 14 ounces (397 grams)
- Auto dimming for day/night brightness, as well as, nine different programmable intensity levels to match ambient light conditions
- Optional POS network capability via RS-232 serial connection. (Contact Everbrite for detailed specifications)

## Optional Radio Frequency (RF) Control System

### FEATURES

- Outdoor range - 3000 ft. (typical line-of-sight application)
- Eliminates the need for data cable and junction box installations
- Increased reliability due to elimination of connection problems caused by cable/connector failures

### SPECIFICATIONS

- Power Requirements: 9 VDC/500ma supplied through AC power adapter
- Radio Transceiver: 2.4 GHz spread spectrum technology, interference-free, meets FCC Class A requirements
- One year limited warranty

\*Red and Amber color LEDs only.  
\*\*Minimum quantities apply.
